# GENERAL INFORMATION

MASTERLIGHT products are designed and manufactured in compliance with **CE** norms. Dimensions are indicated in centimeters. Supply voltage can be either 230V, 50Hz. Luminaires are normally supplied without light sources, except when otherwise indicated in the catalogue. Characteristics of the light sources are indicated in the specifications of each appliance. Products with anodized finishes could show different colour shades due to the industrial galvanic process. Shades have to be considered as aesthetic elements of the product. Polishing process is hand-made. Shades are therefore due to this manual process. Dimensions of products made with deformations of extrusions could be subject to changes of  $\pm 1$ cm. As blown glass is produced by traditional craft techniques, its thickness, colour and finishes are subject to variations, a feature that makes each piece unique. MASTERLIGHT reserves the right to make any technical or formal alterations to its products without giving prior notice, especially for LED sources.

WARRANTY conditions are 5 Years on the LED fixtures.
